### **Workshop: “Qualification of New Equipment” by Brenda Bishop**

Did you ever buy a car without driving it? Probably not.  
Buy a house without inspecting it? Of course not!  
Purchase a piece of equipment for your facility without testing it?...well probably  
Why would you buy equipment without ensuring that it will enable you to meet your customer's requirements?  
This presentation will focus on some the concepts and requirements of qualification of equipment---both manufacturing and testing.

### **Presentation: “Transforming Business Objectives into Process Results” by Chris Anderson**

Given a set of business objectives, identify the business metrics and diagnose the business situation outcomes needed to realize the objectives.

1. Well-Defined Processes
2. Process Effectiveness & Control
3. Scalar vs temporal objectives
4. Current state vs. future state metrics
5. Process Objectives vs Business Objectives
6. Half life of process improvement
7. Selecting objectives
